

A Virtual Classroom For Fully Remote And Hybrid Instruction

BENEFITS BEYOND THE CLASSROOM

With its scalability and flexibility, Bluescape is the equitable, hybrid learning platform for today and tomorrow. Shorten the sales cycle.

- One common platform for in-room, remote, and hybrid instruction.
- Applicable to both classroom and studio environments.
- Workspaces can be used for training and development, internal meetings, and collaborations across departments and with other institutions.
- Multiple deployment options to meet your security and infrastructure needs.

WHAT IS BLUESCAPE?

Bluescape is a visual collaboration solution that provides an easy and engaging way to share content and knowledge between people, even when they're physically apart. Bluescape lets you virtually gather around content to create context and make connections between ideas, information, and data.

WHY CHOOSE BLUESCAPE FOR EDUCATION?

Bluescape lets you bring all your materials into the workspace—including PowerPoint presentations, images and documents, web pages, and videos—to give every student a front-row seat and an equitable learning experience that's far superior to video conferencing alone.

With Bluescape, you can conduct lectures and lead discussions with built-in video calls or integrations with Cisco Webex and Zoom. This flexible hybrid learning platform provides an immersive canvas and features you can use to engage students in and out of the classroom.

- **Lead/follow mode:** Students follow along as you present in the workspace, keeping them focused and engaged.
- **Whiteboarding:** Illustrate concepts and capture ideas with a full suite of whiteboarding tools.
- **Canvases:** Create areas for students to upload and organize their assignments and group projects.
- **Annotations:** Provide feedback on assignments right in the workspace with comments, annotations, or notecards.
- **Built-in video calls:** Conduct lectures, 1:1s, and group meetings with all your materials at hand for a richer, more engaging experience than screen sharing.
- **Content organization:** Plan and organize your curriculum in the workspace with canvases and workspace templates.
- **Persistent workspaces:** Workspaces are available beyond classroom hours for discussions, project work, and group collaboration.

BLUESCAPE FEATURES

Bluescape workspaces are your virtual classrooms for remote and hybrid learning. By tapping into all the features Bluescape has to offer, you'll enjoy an immersive educational experience that benefits instructors and students.

WORKSPACES

Your workspace is your virtual classroom, where you can store, organize, create, and share a near-infinite amount of content and knowledge. Since workspaces are virtual and always on, students can collaborate anytime, from anywhere, on any device.

WHITEBOARDING

Capture ideas and visualize concepts with drawing and diagramming tools.

CONTENT SHARING

Share documents, files, media, and web pages in the workspace to enhance lectures and make them accessible after class.

VISUAL ORGANIZATION

Group content in containers to help your class browse and navigate content.

ANNOTATION

Capture, highlight, and illustrate ideas or give feedback by drawing on the workspace or directly on the content. Add comments and @mention students to notify them of assignments or new information.

COMMUNICATIONS

Conduct lectures via video conferences in Bluescape using built-in video calls or integrations with Cisco Webex and Zoom.

DEPLOYMENT OPTIONS

Whether you're looking to deploy via the cloud or on-premises, we offer multiple deployment options to give you the flexibility and security you need.

API

The Bluescape API enables integrations with third-party software to streamline workflows.

ABOUT BLUESCAPE

Bluescape is the visual platform for high-value collaboration. We bring teams and their work together in one place to overcome information silos and communication barriers, propelling productivity and breakthrough innovation. Customers include Fortune 100 companies, government agencies, higher education, and media and entertainment. A Silicon Valley-based company, Bluescape was named one of the most innovative companies of 2021 by Fast Company.
